Chapter (1) All About Me

Students will

discover

Students will begin exploring Who Am I? by first discovering what they already know and what they wonder about themselves. Students will begin to compare themselves to others, finding similarities and differences. Students will categorize shapes, items and colors. Students will practice counting as a whole group. As students share their ideas, students will use conversation with peers to express ideas.

learn

Students will learn more about traits and honoring each other's similarities and differences. They will practice using the terms, "I am, I have, I like, This is, I can". The skill of counting will be continued as students work toward one to one correspondence on their own. Shape will be used to draw representations of themselves and their favorites. Students will read text with guidance and add details to drawings that support the story. Puppets will be created by the students and used to Role Play situations.

share

Experiences during Discover and Learn will enable students to create a poster that represents their own uniqueness. Students will guide the teacher in creating his/her own poster, and then use that information to help students make their own. To create the poster, students will first draw and/or write about their favorite things. Students will next draw a picture of themselves highlighting their personal traits. The final poster will be created and shared within the group.
